## מחלקת ביטחון

### Access Control System

Dear residents,

In light of the past car thefts, which still exist in the communities in the area, and in order to become more efficient in this matter -

The security department is currently installing a new system at the main entrance gate, which will later also be installed at the other gates.

This system is a means of preventing the entry of vehicles which are not allowed to enter the community.

The system will also facilitate the identification of vehicles belonging to residents of the community - provided they are registered in advance

**This system is not a system to automatically open the gate!**

Please fill out the form below to be listed.

- A resident who registered and then sold / replaced a vehicle - is requested to update the Moked as soon as possible.

For further details, please call the Moked at 09-7929222 / 444 or 106

Thanks in advance,  
Security Department.
